

Profile

I am looking for a summer internship in full stack Software development.

I am a second-year student and am currently working towards a Bachelor of Software Engineering at University of Canterbury.

I have a passion for development, particularly working in a team environment. I enjoy creative projects, where clients and colleagues are involved to make an application with a positive user experience. I am a friendly, hardworking, and self-managed individual. I am a fast learner and look forward to learning new skills.

Relevant Experience

WineWise Application at University of Canterbury

When 10/2024

In this group project, we developed a desktop application to catalogue wine for wineries, liquor stores, and supermarkets to use as a user kiosk in their business. This involved searching for wines, reviewing wines, and viewing wineries on a map. This project taught me how to work in a larger group, and how to manage a project with a larger scope.

- Java
- Git
- SQL
- CSS
- JavaFX

Home Helper Website at University of Canterbury

When 2/2025 – Current

In this full year group project, my team and I are developing a full stack web application for users to manage their home renovations and connect and collaborate with other users. I have played a key role in increasing the standard of this product and have contributed significantly to the design and performance of the product.

- Java
- Scrum
- HTML
- JavaScript

Education

Bachelor of Software Engineering at University of Canterbury

When 2023 - Current

My current GPA is 7.31/9, a full academic transcript is available on request

Employment History

Sales Assistant at Kathmandu Tower Junction

When 10/4/2022 – Current

In this position, I engage in customer interaction and help them navigate the store, as well as decide which product is best for them. This position involves working in a team and using the store software to complete purchases and use a loyalty program. At Kathmandu, I have learnt teamwork, customer service, opening, closing, banking, and completing online orders.

Key Skills

- Python
- Java
